BUD'S GUIDE TO CANNABIS

CARYOPHYLLENE

The terpene in a cannabis strain is what gives it its unique flavor and smell. Caryophyllene is a terpene found in many cannabis strains, including Bluebird. It has a spicy, peppery taste and is known for its anti-inflammatory properties.

North Worcester Is Home

Bud's Goods & Provisions

PHOTOS BY ANDREW SCOTT WILLIS, TUNGSTEN VIDEO CONSULTING

Located in the hopping neighborhood of North Worcester, Massachusetts, Bud's Goods & Provisions has refurbished a local landmark building as its first location. The interior is a fusion of art deco design elements with references to historic Worcester all configured to encourage some cannabis browsing. ¶ "The goal was to design a space that was inviting and unexpected, a fun but sophisticated cannabis buying experience. To build a place people would feel excited and proud to call their dispensary and ultimately a place where I would want to shop for my own cannabis," says Alex Mazin, CEO of Bud's Goods & Provisions. ¶ Mazin credits his diverse large team made up of sign, print, and flea market vendors; lighting designers; craftsmen; and creative agency Bobby Redd with helping bring his vision to fruition.
